## **Additional Observations arising from the Province's Metrics Report**

1. Of the **seven** Year 2 obligation areas analyzed above, **only one** (reduction of 'waitlist') come anywhere near to meeting the Remedy's requirements.
2. The number of 'young people' under age 65 living in Long Term Care ('LTC') has actually increased by more than **12%** from baseline. The baseline (January 2023) total was **424**. At the end of December 2024, it was **460**. By the end of March 2025, it was **476**.
3. **Only one person** aged under 65 has moved out of LTC since the Remedy started.
4. The Province's reliance on Temporary Shelter arrangements (TSAs) has increased significantly. At baseline in 2023, there were 83 and now there are 146—an increase in **76%**.
5. While the DSP Waitlist has been reduced by 26% from Baseline (2023), the average wait time (in days), has increased considerably: 2115 days (5.8 years) in Dec 2023 to 2400 days (6.6 years) as of March 2025—an increase of over **13%** in length of wait.
6. In terms of LAC and IPSC recruitment, there were **zero** LACs hired and only **four** IPSCs hired in the first three months of 2025 even though recruitment in Y1 and Y2 is far below that required by the Remedy.
7. **No** participants have been approved for individualized funding under the new IF Policy/Program as of 01 April 2025.
