Other Comments Arising from the Metrics Report and Disaggregated Data

1. Re Transitions from Large Institutions to Where?

A review of the Metrics Report (Appendix B) and the Disaggregated data (Table 6) shows that 14, 29 and 11 people left ARCs, RCFs and RRCs (respectively) for ‘community settings’ this fiscal year. However, it is clear from the Metrics Report that the total numbers which actually left ARCs, RCFs and RRCs was considerably larger.

Thus, while 14 transitioned from ARCs to ‘community settings’ so far this fiscal year (per Table 6), there were actually a total of 41 fewer people in ARCs in the same period (per the Metrics Report above)—where did those other 27 go? Similarly, while 29 left RCFs for ‘community’, a total of 40 left RCFs, where did the other 11 go? Interestingly, there is a disparity of only 2 between the number who left RRCs in the period and the 11 who entered ‘community’.

2. Re Numbers in Small Options Experiencing a LOT of growth—from Large Institutions and Group Homes/DRs

In 2023, the Baseline number of people living in Small Options was 756. A year ago (December 2024), there were 858. As of the end of December 2025, there are about one hundred more at 957. That is an increase of 27% from Baseline.

The disaggregated data tells us that in the first 9 months of the current fiscal year, of the 113 persons who left large institutions or Group Homes/Developmental Residences for community settings, 70 (62%) moved to Small Option homes. Part of this is because, over time, as many Group Homes downsize, they are being reclassified as Small Option homes.

3. Re Temporary Shelter Arrangements (TSAs) placements: From Where?

Reviewing disaggregated data from 2025 and 2026, one can see more detailed information about the use of so-called Temporary Shelter Arrangements (TSAs).

Since April 1, 2024, until the end of December 2025, there have been a total of 260 transitions from ARCs, RCFs, RRCs and Group Homes/Development Residences to ‘community based settings’. Of these, only 21 or 8% are from these institutions to Temporary Shelter Arrangements.

Despite a common understanding that TSAs are approved for people leaving the OSD institutions or GHs/DRs, the reality is that these are *not* the source for over 90% of TSAs.

Many, if not most, seem to be coming from family homes.
